2016 Sure Gro Land Management Product guide.

INTRODUCTION

Dear Valued Customer,

Hello and welcome to the 2016 SureGro **Land management product** guide.

We are hoping you have had a successful 2015 and look forward to working with you again this year.

SureGro carries over 1,000 product lines relating to the Land management, Civil, Landscape and Horticultural field. Whilst this guide aims to inform you; it focuses on products relating to *land management*. Other guides are available upon request.

We are excited to announce some new aspects to the SureGro range:

- **New tree guard designs and selections. (45 types!)**
- **New Soil health and direct seeding technology.**
- **Bush Regeneration tools and products.**
- **Wider range of weed control and erosion control matting.**
- **Hydro seeding and dust suppression products.**
- **Wider range of EVERYTHING!**

We do try to keep our customers up-to-date with our products. We recently installed a new sample and display section at our facility in Dingley; feel free to come in and check it out.

If you require more specific product information or on-site assistance; feel free to contact us and we will organise an appointment.

We are constantly updating our website and social media with product updates, projects and special offers.

If you require any assistance with your project, planning, pricing or samples please let me or any of the team know.

TABLE OF CONTENTS

Introduction.

Site Preparation

Erosion and weed control products, Sediment control products.

Fabrics, Fastening Pin Guns, Survey pegs and Marker stakes.

Dust Suppressants and Soil Tackifiers.

Soil conditioners, Amendments, bio stimulants and probiotic products.

Revegetation

Planting tools, Water crystals, Gels and Planting tablets.

Tree guard sleeves, Milk cartons and Core flute guards.

Pre-Cut Plastic mesh, Mesh Guard rolls, wire frames and Bamboo stakes.

Hardwood stakes and plant weed mats.

Direct Seeding, Hydro-seeding and Seed cleaning sieves.

Browsing Prevention, Frost and stress prevention, Wetland establishment products.

Bush regen / maintenance

Bush Regeneration tools, Gloves, Secateurs.

Loppers, Shears, Extension poles, Saws and Knives.

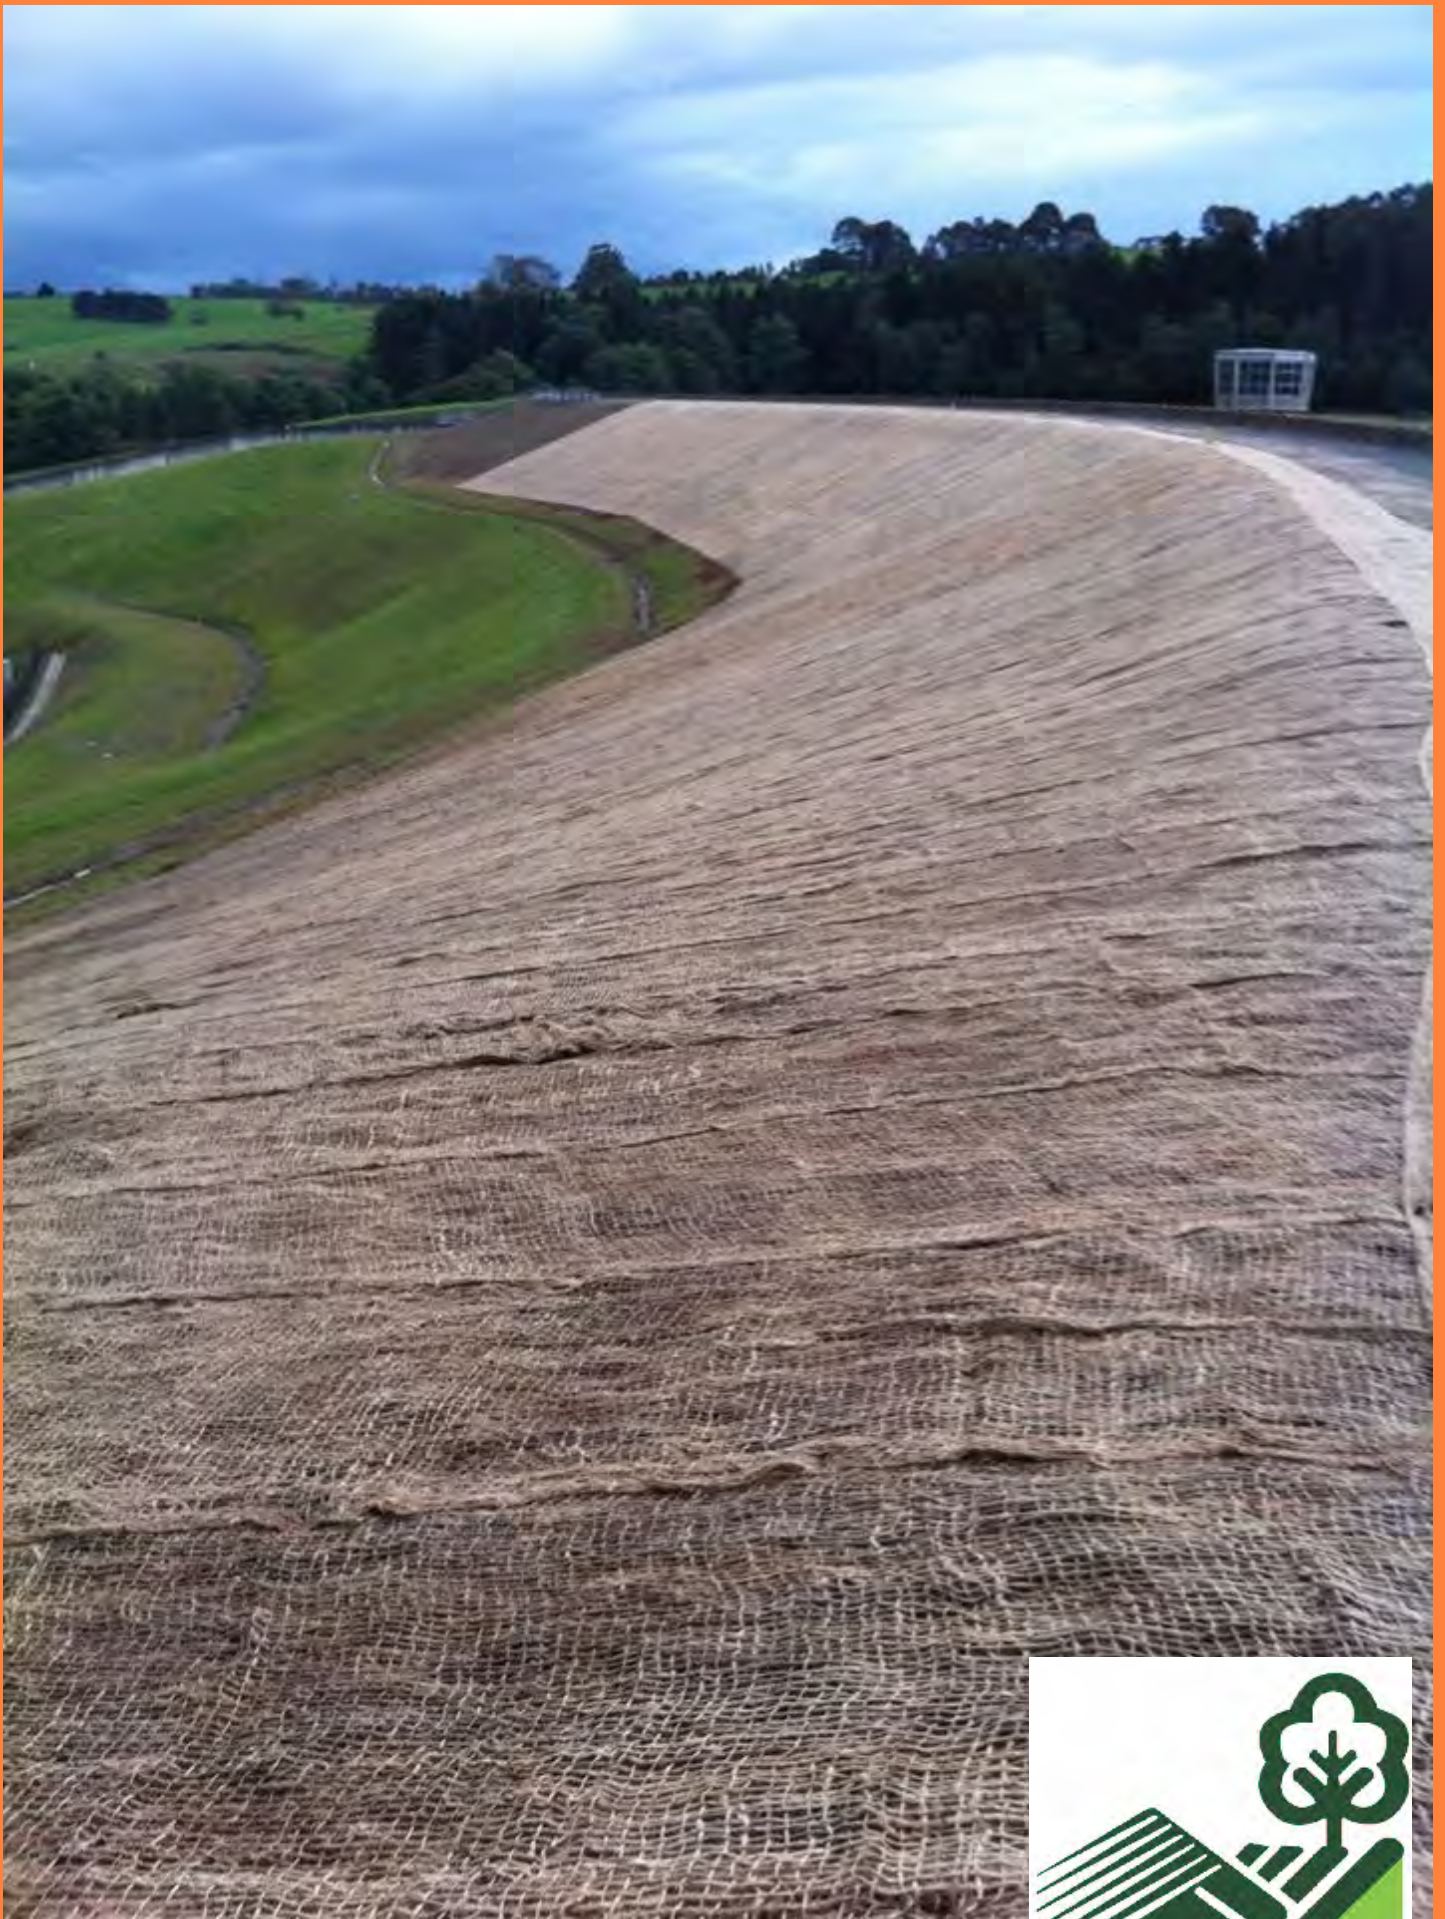

Tool Sharpeners, Bush regen holsters, Herbicide bottle holsters.

Contact Herbicides.

Selective Herbicides.

Spray additives and Markers.

Herbicide Sprayers, Granule Spreaders, Herbicide handling products.

Site Preparation.

2016 Sure Gro Product guide.

Erosion and Weed Control Materials

Code	Product name	Product description
Jute Ad 350gsm Roll	Advanced Jute	1.83m x 25m - 350gsm (45.75m ²) Mix of plant fibres giving a longer effective life in the field. Fire Retardant and lighter than std Jute.
RFM01 / RFM01S5	Recycled Fibre Matting	1.8m x 50m – 350gsm (90m ²) Diverted clothing from landfill etc Great erosion and weed control. Easy to use and effective 24+ months.
RFM01S5	Recycled Fibre Matting	1.8m x 50m – 350gsm (90m ²) – <i>pre-slit at 5/m²</i> for planting. Diverted clothing from landfill. Great erosion and weed control. Easy to use and effective 24+ months.
RFM02	Recycled Fibre Matting	2.4m x 50m – 350gsm (120m ²) diverted clothing from landfill etc Great erosion and weed control. Easy to use and effective 24+ months.
RFM01REINFORCED	Reinforced Recycled Fibre Matting	1.8m x 50m – 350gsm (90m ²) –Heat treated material. Higher grade erosion control. Easy to use and effective 24+ months.
JSG800	Sure Jute Matting	1.83m x 25m – 770gsm – (45.75m ²) Made from plant fibre – fully biodegradable and lasts up to 18 months.
JSG800S4	Sure Jute Matting – Pre slit.	1.83m x 25m – 770gsm – Pre-slit at 4/m ² for planting. (45.75m ²) Made from plant fibre – fully biodegradable and lasts up to 18 months.
JSG800S6	Sure Jute Matting – Pre slit.	1.83m x 25m – 770gsm – Pre-slit at 6/m ² for planting. (45.75m ²) Made from plant fibre – fully biodegradable and lasts up to 18 months.
JSG280G	Sure Gro Fine Jute	W: 2m x L: 50m -280gsm (100m ²) Used in low erosion risk sites and in grass establishment situations.
JUTEMSH	Jute Mesh Soil Saver	W: 1.22m x L: 548m – 600gsm (670m ²) fantastic “active erosion control” matting. Economical and adaptable.
CM01	Coir Mesh	W: 2m X 25m – 700GSM (50m ²). Heavy duty “active erosion control” matting.
HCLOTH01 or 02	Hessian Cloth - STD	W: 1.8m x L: 50m (90m ²) – 14oz OR 18oz. Used in all sorts of horticultural and erosion control situations. – STD THICKNESS
SEED	Sterile Rye Grass 25KG	Assists in the prevention of or increase in erosion on hard to access locations. Completely sterile and will not spread.

Sediment control products

Code	Product name	Product description
SILTLOX	SiltLox	Star picket / Hardwood stake safety attachment. Keeps material tensioned. Safer, more efficient.
CLO01	Coir Log	3m x 300mm diam. Sed/erosion control. Used in a variety of erosion and sediment control situations, very versatile and durable material.
CLO02	Coir Log	4m x 200mm diam. Sed/erosion control. Used in a variety of erosion and sediment control situations, very versatile and durable material.
CLO03	Coir Log	2m x 300mm diam. Sed/erosion control. Used in a variety of erosion and sediment control situations, very versatile and durable material.
Silt01	Silt Stop Silt Fence	.77m x 100m roll. Rated for Low Flow 10L/m ² /sec:
Silt02	Silt Stop Silt Fence	.86m x 100m roll. Rated for Med Flow 12.5L/m ² /Sec:
SSOCK01 /02	Filter Sock	1m x 150mm, sediment control sock. Used with rock or site fill. Geotextile material for long life.

2016 Sure Gro Product guide.

Fabrics and Materials

Code	Product name	Product description
FILT01	SureGro Filter Fabric	W: 1m x L: 50m – 130sm (50m ²) All round geotextile for use in various situations.
SHADE01	Shade Cloth - 50 % SHADE	1.83m x 50m - (90m ²) Assists in the growth and establishment of sun-sensitive plants.
SHADE02	Shade Cloth - 70% SHADE	1.83m x 50m - (90m ²) Assists in the growth and establishment of sun-sensitive plants.
WIND01	Wind Break Woven PP	1.83m x 50m (90M ²) Assists in slowing down wind in newly planted coastal zones or growing situations.
WEED05	Mulch Mate - roll	1.8m x 50m (90m ²) Spun bonded material – helps hold mulch in place, allows air movement, prevents weeds.

Fastening pin Guns

COBBER150	Cobber Pin gun 15cm	Made in AUS. Hand activated. Suits Cobber Pin gun 15cm.
COBBER200	Cobber Pin gun 20cm	Made in AUS. Hand activated. Suits Cobber Pin gun 15cm + 20cm

Fastening pins

PINCOBBER15	15cm Cobber Gun pin	15cm X 3.3cm X 15cm – 4mm gauge. BOX 1000.
PINCOBBER20	20cm Cobber Gun pin	20cm X 3.3cm X 20cm – 4mm gauge. BOX 750.
PIN15	15cm Fastening pin (loose)	15cm Fastening pin - 4.00mm gauge. BOX 500.
PIN20	20cm Fastening pin (loose)	20cm Fastening pin - 4.00mm gauge. BOX 150.
PIN30	30cm Fastening pin (loose)	30cm Fastening pin - 4.00mm gauge. BOX 150.

Survey Pegs and Marking stakes

H305025	Survey Peg	30cm Hardwood survey peg: 30cm X 50mm X 25mm (unpainted)
H455025	Survey Peg	45cm Hardwood survey peg: 30cm X 50mm X 25mm (unpainted)
H605025	Survey Peg	60cm Hardwood survey peg: 30cm X 50mm X 25mm (unpainted)
H905025	Survey Peg	90cm Hardwood survey peg: 30cm X 50mm X 25mm (unpainted)
BN600C	Bamboo stake	60cm: 10- 12mm diameter. – Used with 2 litre Milk carton, harder ground.
BN750C	Bamboo stake	75cm: 10-12mm diameter. – Used with 45cm tall guards.

Erosion Control

Advanced Jute Matting

Specification Sheet

Description:

When it comes to optimising growth and minimising weed competition Advanced Jute Geotextile has it all. More durable and faster to lay than conventional jute due to its lighter weight, Advanced Jute geotextile makes molding and shaping the terrain around you effective, easy and economical.

When it comes to OH&S, Advanced Jute geotextile is 50 per cent lighter than conventional medium jute. Being a pressed material there is no dust to contend with your customers and staff will find working with Advanced Jute so much more satisfying. Advanced Jute can be delivered with pre cut slits for planting, or you can now easily cut them yourself on-site.

Applications:

- Slopes
- Landscaping or roadsides
- Coastal areas with high winds
- Wetlands and riparian areas
- Sites prone to bushfires

Specifications:

Dimensions: Height - 1.83 m x 25 m roll (covers approx 45 m²)

GSM: 350

Composition: 90% Flax & Ramie organic fibres
10% Polyester & Polypropylene synthetic fibres

Duration: Lasts up to 2 years

Benefits:

- Light weight
- Predominantly organic fibres that biodegrade
- Strong fibre that is durable
- Pressed material makes it stronger than other geotextile matting
- Fastened using standard "U" shaped pins
- Accumulates less dust than other geotextile matting
- Material is significantly less flammable than other geotextile matting
- Dark colour minimises light reflection
- Available in with slits for planting

2016 Sure Gro Product guide.

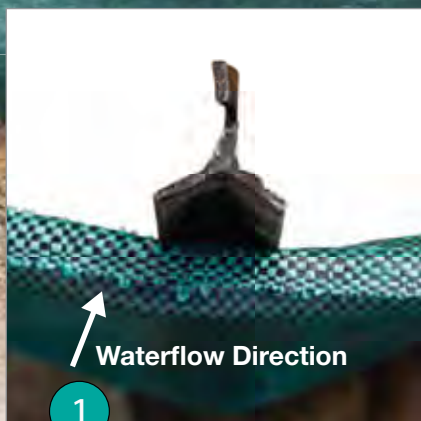

Code	Product name	Product description
Dust Suppressants and Soil Tackifiers		
COMING	RT5 SuperSkin	Stockpile and Exposed ground crusting agent. 25, 200, 1000L
COMING	Total Ground Control	Dust Supp, Erosion Control, long term crusting. 25,200, 1000L
COMING	Sedibind	Sediment control Spray. 25,200, 1000L
COMING	Prime X	A "Primer" for RST's Superskin veneering products, Sedibind etc
Soil Conditioners and Amendments		
WA20L	Earthcare Liquid Wetter Aid 20L	Soil Wetter and Conditioner. Helps water and nutrients infiltrate hydrophobic soils.
CLAYB	Groundbreaker 20L	Liquid gypsum to assist in the breaking up of clay without digging.
TERRAFORM12.5	Terraform Soil conditioner- 12.5kg	Mix of fertiliser, Soil conditioner and Soil wetter. Fantastic for hard-to-establish locations such as mine sites.
OS28	Osmocoste Plus Lo P 25kg	8-9 Month Controlled release prill - Low Phosphorus, for P sensitive native plants. N.P.K.: 16 + 1.3 + 9.1 + TE
TERRAFORM12.5	Terraform Soil conditioner- 12.5kg	Mix of fertiliser, Soil conditioner and Soil wetter. Fantastic for hard-to-establish locations such as mine sites.
SEA5L, SEA20L, SEA200L	Seasol 5, 20 and 200L	Liquid Kelp, stimulates roots, Increases resistance to plant stresses.
TROFORTE1	All Purpose 20KG	Controlled release fertiliser prill. Microbe and Mineral enriched – 9 Month release. NPK: 16-3-9+TE
TROFORTE2	Native 20KG	Controlled release fertiliser prill. Microbe and Mineral enriched – 9 Month release. NPK: 18-1-19+TE
TROFORTE3	All Purpose 20KG	Controlled release fertiliser prill. Microbe and Mineral enriched – 6 Month release. NPK: 16-3-9+TE
TROFORTE4	Native 20KG	Controlled release fertiliser prill .Microbe and Mineral enriched – 6 Month release. NPK: 18-1-19+TE
SEAPF5L, SEAPF20L, SEAPF200L	Powerfeed 5, 20, 200L	Organic (fish based) Liquid fertiliser and soil conditioner.
SEAPL5L, SEAPL20L, SEAPL200L	Seasol + Powerfeed 5, 20, 200L.	Seasol Plus is a unique blend of Seasol, fish, humate and fulvate for use where soil condition and root activity are important.
SEAPFI5L, SEAPF20L	Seasol Powerfish 5L, 20L	Earthcare power-fish is a fish concentrate and not an emulsion which means this product is 100% soluble and can be applied to either the soil or the foliage.
SEAOH20L	Seasol Organic Humate 20L	Humate assists the development of improved soil structure and soil moisture retention, while also helping to increase nutrient availability and reducing nutrient leaching.
Soil Biological Stimulants and Probiotics		
VAM1, VAM8, VAM15	Mycro-gro 250. 1kg, 8kg, 15kg – (VAM)	<i>Glomus intraradices</i> – Mycorrhiza. Granules for including into the soil profile. Encourages the rebalancing of soil life.
STUBBLE2, STUBBLE7	Stubble Digester 2L, 7 +3.8L	Liquid fungi culture + nutrient, designed to assist the breakdown of unwanted stubble and vegetative material.
WATTLE400, WATTLE3	Wattle Grow bacterial Inoculant liquid. 400ml and 3 litres.	<i>Bradyrhizobium spp.</i> Used in Direct seeding and nursery for increased germination of wattle species. – Ask for a spec sheet today!

Siltlox

Smarter Quicker
Silt Fence
Installation

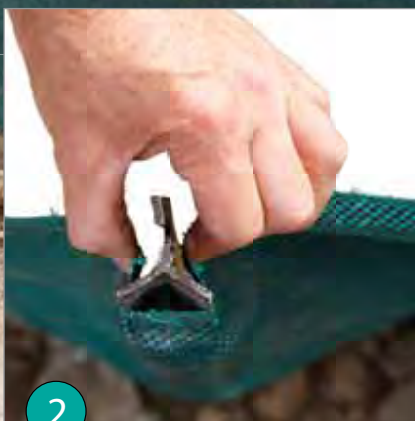

Environmental Compliance is easy with Siltlox tubes

Siltlox Installation Instructions –
Using Star Pickets and Silt fence

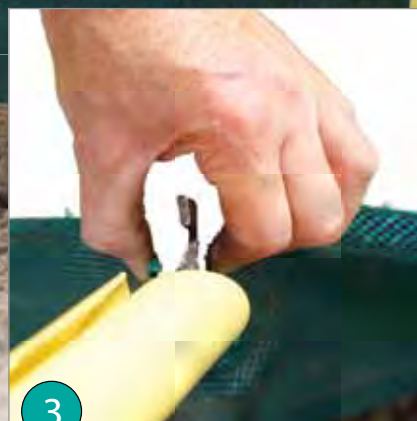

1

Install star pickets at 2 metre intervals with the two arms of the 'Y' profile facing the uphill or water flow side. Run the silt fence barrier along the two arms side.

2

Allow enough slack to pinch the fence with thumb and fore finger to wrap around the two arms of the 'Y'.

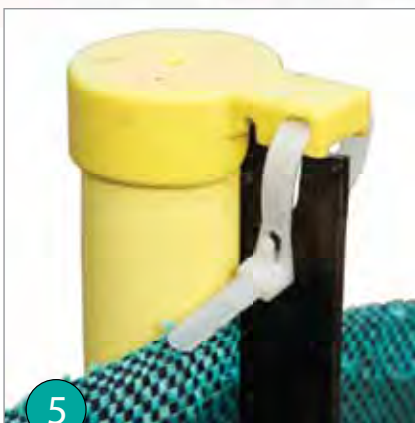

3

Position the Siltlox tube slot so it slides down over the two arms of the 'Y'. As it slides down it entraps the fence around the two arms.

4

Continue to hold the fence as the tube slides down until the top of the tube meets the top of the picket.

5

Insert the cable tie through the top hole of the picket and into the locking mechanism and pull tight. Siltlox is now securely installed.

6

Move to the next picket, tension barrier between pickets before repeating steps 2 through to 5. To seal the base of fence, trench or bury the tail.

To remove fence

Using one thumb press the release lever on the cable tie against the picket, pull strap out from other side, slide Siltlox up to release fence.

High Performance sleeve

SureGro supplies a wide range of UV stabilised Plastic tree guard sleeves. With varying heights, widths and thicknesses to choose from there is surely a guard for you!

Standard tree guard sleeves are 100um thick, whilst our high performance guards are 120um thick.

Use Sure Gro's Guards in conjunction with either three bamboo or hardwood stakes, depending on the soils in question.

Sure Gro's Jute, Recycled Paper and Recycled fibre weed mats are designed to be used in conjunction with our tree guards. They will not only prevent competition by weeds, but will increase water retention by soil.

Ask us about what guard, stake and weed mat will be best for you!

Milk carton range

Printed / embossed Milk cartons available!

Have your name on your guards! Just ask!

The much loved Milk carton has always been and always will be a favourite of Land Managers all around the country. It is easy to use, with the 2 litre and 3 litre types coming pre-tabbed for your stakes.

The standard 1 and 2 litre options breakdown in the field over 1-2 years (depending on moisture availability). This is a great feature, but sometimes does not allow long enough for the plant to properly establish.

Now SureGro can supply a cardboard composite (mix) range, that will keep its structure for 2 years+. This is ideal for moist areas or for areas where plants can take longer to establish.

Other dimensions available on request.

SureGro supplies a wide range of UV stabilised Plastic Core Flute tree guards. With varying heights and widths to choose from, there is surely a guard for you!

With two types of guard (pre-welded and tabbed) we have your needs covered.

Use Sure Gro's Guards in conjunction with a single hardwood stake. The use of a single bamboo stake in the opposing side for windy sites.

Sure Gro's Jute, Recycled Paper and Recycled fibre weed mats are designed to be used in conjunction with our tree guards. They will not only prevent competition by weeds, but will increase water retention by soil.

Ask us about what Sureflute guard, stake and weed mat will be best for you!

Sure Gro Conical Guards

After much discussion with industry, SureGro have released yet another new innovation. The Conical Guard is designed specifically for use with plants that require room to spread; such as grasses, tussocks and small shrubs.

- Available in and 35cm X 20cm (std)
 - Directs rainfall to the root ball.
 - Allows for natural growth and development.
 - Requires only 2 hardwood stakes to fasten.
- Prevents predation from a range of aquatic and terrestrial browsers.
 - Minimises weed growth within the guard.
 - Minimises spray drift between guards.
 - Easy to assemble and install.
- Uses a tabbed system for easy retro-fitting and release when finished.
 - UV stabilised
 - Reusable when stored with care

COBBER™ STAPLE GUN SERIES 2

Introducing the **COBBER™ Staple Gun Series 2**. Constructed of the lightest weight materials, including 5005 aluminium body, stainless steel drive shaft, Susta-glide moly filled dry lube casing, and for low maintenance the **COBBER™ Staple Gun** has monomer cast bushes.

The **COBBER™ Staple Gun Series 2** has been designed for excellent performance on sites up to 45° degrees gradient, to accommodate this the handle is fully adjustable and can rotate to 90° degrees.

COBBER™ Features	COBBER™ Benefits
<p>PSI TECHNOLOGY (POSITIVE STAPLE INSERTION) The Patented PSI Technology is the much anticipated anti-jamming device developed by the COBBER™ International Team. This technology resolves the problems of multiple staples jamming in the gun, eliminating poor performance, and site problems experienced by other staple guns throughout the industry.</p>	<p>LIGHT WEIGHT The COBBER™ weighs in under 5.5 kgs making it easy to hold, easy to manoeuvre, and supporting OH & S.</p> <p>PERFORMANCE & ACCURACY The COBBER™ can deliver a staggering 3300 staples per hour with accuracy on varying gradients.</p>
<p>EASY GLIDE SYSTEM The COBBER™ patented Easy Glide system allows high performance with no field maintenance. Weighing under 5.5 kgs the COBBER™ is the lightest, fastest and most reliable fastening system available.</p>	<p>LESS DOWN TIME & INSTANT STAPLE REMOVAL The COBBER™ Staple Gun series 2, has a quick release opening carriage for easy site inspection</p>
<p>COBBER STAPLES COBBER™ international delivers the complete package with staples being manufactured & designed specifically for the COBBER™ staple gun.</p>	<p>SAFE TO OPERATE The COBBER™ is so light and easy to operate, reducing stress and fatigue compared to other industry models.</p>

Available in two sizes, the **COBBER™ 150** for 150 mm staples, and a **COBBER™ 200** for 200 mm staples. Both are made from HD nail wire at an average of 900 Mpa.
